

Uvex

PROTECTING PEOPLE

Safety Eyewear 2007/2008

Innovative in both design and functionality

Value follows innovation

New corporate vision and industrial health and safety strategy

The uvex group has successfully completed the transition from turnover to value orientation. In line with this new strategic approach, a new corporate vision has also been developed to provide a basis for the company's long term plans including a clearly defined industrial health and safety strategy and objectives for our different product groups.

VISION

"In the world of uvex, we intend to be leaders in innovation – creating global value-oriented growth and the number one position in all our markets and areas of activity.
Value follows innovation!"

In other words, our vision is determined and guided, by the key corporate principles of leadership in innovation and worldwide value-oriented growth.

MISSION

Within this framework, a mission statement has been defined which describes our prime corporate objectives: "The uvex brand confirms our responsibility. The central theme of **Protecting People** is our mission and this is why we are committed to develop, manufacture and distribute products and services which deliver individual safety and protection in the fields of work, sport and leisure."

At the core of this strategy is the principle of being the „innovative provider of brand systems supported by world class manufacturing expertise“. This includes the goal of providing a product range which is pioneering in technology and coordinated throughout manufacture in our own factories – a “head to toe” range brought together under one brand. This represents an entirely unique position compared with our competitors around the world!

“uvex products should inspire!”

The development of this universal strategic platform is an enormous step forward for the company and ultimately, it will ensure that uvex industrial health and safety products always remain at the leading edge of developments across the different sectors.

The “2007 Top 100 Corporate Comparison” conducted independently and scientifically, voted the UVEX SAFETY GROUP as one of Germany’s most innovative medium sized companies – and we succeeded in securing a place in the top 10 in the “Innovation marketing” category of the ranking! Now officially classified as a top innovator, uvex will continue to demonstrate to its customers that it is an undisputed leader in the field of innovative industrial health and safety solutions.

uvex industrial health and safety and prevailing strategic platform of the UVEX SAFETY GROUP

Adapted to specific product and market conditions, our industrial health and safety strategy is defined as follows:

“Based on our ‘Protecting People’ mission statement, uvex safety has positioned itself as the innovation based **provider of brand systems from a platform of world class manufacturing expertise**. Structured around the four Strategic Business Units (SBU):

- Head Protection (safety eyewear, prescription safety eyewear, laser safety eyewear, safety helmets, hearing protection, care accessories)
- Workwear (work and safety clothing)
- Footwear (safety shoes and boots, high-performance socks, care accessories)
- Gloves (safety gloves for mechanical and chemical risks)

uvex safety offers market sector-specific **product system solutions** drawn together from our different product groups, and **customer system solutions based on real** market needs.”

The list of contents can be folded out at the back of the catalogue.

uvex climatec® – climatic comfort

Innovative climate management from head to toe

Head protection

uvex airwing B with maximum ventilation surfaces

Protective eyewear

Protective gloves

uvex Profas helix® – a new comfort class with cut protection level 5

Protective clothing

uvex texpergo System SoftShell jacket – with innovative body zoning concept

Safety footwear

uvex xenova® climatec® – pleasantly dry thanks to the new uvex bamboo liner

The UVEX SAFETY GROUP is the only manufacturer in the international personal protective equipment (PPE) sector that has researched climate issues within occupational safety products, resulting in uvex climatec®. A comprehensive climate concept for all areas of activity and work environments. The result: increased well-being, longer lasting productivity and optimal comfort in every situation!

Every workplace puts different demands on the occupational safety system regarding the prevailing climate influences and air movement conditions. Irrespective of warmth, cold, wind and water, activities that require standing, intermittent movements or long-term demands – uvex climatec® offers the solution to keep the body comfortable in every situation and to increase the performance in day-to-day work. To make this possible uvex has combined its competence in research, use of materials and product development and is the only manufacturer of personal protective equipment that presents a functioning climate concept that is applied in an integral approach over all product groups.

uvex climate competence

uvex climatec® functions like the body's own climatic system: deviations from the individual climate are balanced and the body temperature remains at a consistently comfortable level. Excess warmth and moisture are efficiently removed reducing the feeling of cold. To effectively improve the climate in an occupational safety system, it is essential to analyse all relevant factors and investigate and understand their mode of operation.

uvex has been researching climate issues for a long time. In collaboration with well-known institutes such as PFI (Pirmasens Testing and Research Institute), the Kaiserslautern Technical College or the Hohenstein Institutes, testing methods and devices were developed that allowed a comprehensive and well-founded measurement of climate characteristics.

guaranteed

The test conducted under standard conditions for temperature and pressure, illustrates that the super g supravision NC coating stays mist-free for twice as long as required.

climatec® glasses

Amount of time super g remains mist-free

Requirements as prescribed by Norm

time

uvex super g – the lightest safety glasses in the world

Through the new high-tech coating **supravision NC**, the spectacles stay mist-free nearly twice as long as prescribed in the European Standard EN 166.

The unique frame concept replaces the traditional fixing of the temple arms by a fatigue-proof, highly flexible mono-frame and furthermore has an innovative temple arm design with patented x-stream technology (XST) which provides pressure-free, comfortable wearing and extreme non-slip quality.

uvex manufacturing and technology

uvex industrial health and safety – the systems provider with world class manufacturing expertise

Our corporate philosophy is „Protecting People” – a major responsibility and a fascinating challenge, because at uvex, protecting people is both our goal and our motivation.

To guarantee the outstanding performance of our products, we depend entirely on our expertise and experience. Our own research and development, individual process technologies and decades of know-how are the core strengths which support all uvex product groups.

Without the highly qualified specialists in our product group management teams and manufacturing facilities and without the intensive collaboration of our network of high-calibre technology partners, and not least without the close contact with our customers, we would not be capable of developing products that reaffirm time and again the credibility of our claim to be the leader in innovation.

Quality direct from the manufacturer

Almost 80 per cent of our entire added value is generated in six manufacturing plants in Germany, three in the rest of Europe and one outside Europe. In these facilities, we combine the latest technologies with innovative drive and a high degree of experience. Our quality standards exceed the most stringent requirements and thanks to our universal quality management system, all our factories are certified in accordance with ISO 9001:2000.

Protective eyewear production in Fürth

In the last few months, a unique specialist centre for protective eyewear has been opened alongside the eyewear production plant in Fürth. By integrating the laser protection experts Laserservice, all relevant fields in protective eyewear have been concentrated on one location – goggles and spectacles, wide-vision spectacles, prescription safety goggles, laser protection goggles, the development and production of unique lens coatings, and an innovation centre. This combination is unmatched anywhere in the world!

ogical expertise

uvex academy – knowledge for greater safety

The uvex academy stands for outstanding knowledge in the field of industrial health and safety. Set beside our products and services, uvex is the first manufacturer to have developed and to be able to provide such a pioneering institution. The uvex academy – for the education and training of our customers, employees and industrial health and safety experts.

In premises covering 1,000 square metres, uvex is now the reference point and first choice for the provision of outstanding training and education in an environment where health and safety subjects are brought to life.

Want to know more about our know-how? Simply request the uvex academy brochure.

Safety eyewear

Technology

Adjustable side-arms

The inclination and length of the side pieces can be adjusted to provide perfect fit and comfort.

Maximum wearer comfort

A secure and pressure-free fit thanks to uvex quattroflex side pieces with four soft pads.

Fast lens replacement cuts costs

Quick and easy lens replacement makes the adjustment to different working conditions and light levels, easy.

The highest optical quality in accordance with EN 166

Freedom from distortion prevents the symptoms of fatigue. Ideal for constant use in work which place particularly high demands on the eyes.

Lightweight

Ultra light for permanent wearer comfort. So light that you can wear them all day long.

High Impact Protection

Extremely impact-resistant polycarbonate for maximum protection against all mechanical risks in line with EN 166.

supravisision NC

Coating technology

Perfect visibility in spite of dirt and dust

With NanoClean for quick cleaning

Safety eyewear

Coating technology

Our unique **supravisión HC-AF** technology enables us to apply a coating which makes the lens extremely scratch-resistant on the outside and permanently antifog on the inside. It also provides 100 % UV protection.

Individual side-arm inclination

Adjustable side-arm inclination guarantees that uvex safety eyewear can adapt to fit any head shape, ensuring higher wearer acceptance.

Lenses coated with **supravisión NC** combine the advantages of optidur NC and optidur 4C PLUS. They are scratch-resistant and non-fogging on the inside, while the outside is extremely scratchproof, resistant to chemicals and very easy to clean thanks to nanotechnology, resulting in a top-class coating.

Individual length adjustment

As the shape of everyone's head is slightly different the fact that uvex safety glasses come with a range of length settings and adjustability, ensures a comfortable and correct fit for all.

Lenses coated with **optidur NC** are extremely scratch-resistant and are also highly resistant to chemicals. The lacquer system features nanotechnology, considerably increasing its non-stick properties. As a result, water-based and oily marks can be removed effortlessly.

uvex quattroflex

Four pads around the sensitive ear area ensure a comfortable, pressure-free fit.

optidur 4C PLUS combines 4 features in one lens for permanent antifog, scratchproof and antistatic properties plus 100 % UV protection.

uvex duo-flex

The unique, patented soft pads on the ear pieces snugly fit any head shape, preventing pressure points behind the ears and guaranteeing a secure fit.

infradur PLUS welding lenses protect against ultraviolet and infra-red radiation as well as glare. The coating minimises welding spark damage.

Suitable for use with prescription glasses

Overspecs and goggles in particular, must be able to provide a pressure-free fit when worn in conjunction with prescription spectacles. We meet this requirement by developing suitable designs and using high-quality materials.

ultradura is an inexpensive coating that gives lenses a good level of scratch resistance and completely absorbs harmful UV radiation.

uvex „**easy to clean**” glasses are also less susceptible to dirt.

super g

The world's lightest safety glasses at only 18 g!

Excellent non-slip properties

Total weight of only 18 g

Unique x-stream-technology (XST) for maximum comfort thanks to a smooth transition from hard to soft plastic.

Focus Safety
Silver 2007

uvex super g · 9172

This exciting eyewear concept unites innovative technologies and high-tech materials.

The lens
Using state-of-the-art manufacturing processes, an extremely thin lens with exceptional optical clarity can be created. The lenses have ideal aerodynamics and are angled forwards to provide excellent ventilation, keeping the eyes comfortable.

The frame
The frame is made of ultra light, high-tech polymers, guaranteeing maximum flexibility. The innovative side piece concept features uvex x-stream-technology for an excellent, non-slip fit and a wide range of applications.

The result
The super g is completely metal-free and provides top-level protection – and all that at only 18 g!

uvex gravity zero · 9191 with "Z" fold

Is it its lightness that makes the uvex gravity zero so unique? Or is it the innovative combination of materials, design and technology? Many different factors make our new uvex gravity zero precisely what it is – truly state of the art, providing style, protection, fit and comfort in a product that is so light you can't see how little it weighs. You will just feel it, but only just. The new uvex gravity zero has been tested under extreme conditions and is more than equipped to tackle the rough and tumble of the working world. Its revolutionary side piece technology makes it ideal for use in a wide variety of workplace environments and for a wide range of applications. With more head contact points than conventional spectacles, these spectacles also fit better, guaranteeing maximum comfort. Just as the wind appears to move things effortlessly and make them appear weightless, so too does the uvex gravity zero appear to be weightless, moulding to fit any head shape.

uvex i-vo

uvex i-vo · 9160

uvex i-vo, the „eye-volution” in protective eyewear. When it comes to comfort and looks, i-vo does not compromise, making these spectacles incredibly popular among wearers. They are not only uncompromisingly safe but also excellent in terms of comfort and design. This is guaranteed because of uvex's duo component technology, which ensures that the spectacles not only tough, but also smart. Soft components around the sensitive parts of the face (nose, forehead, ears) guarantee permanent maximum comfort.

Available with side pieces:
Four soft pads on the quattroflex side pieces reduce pressure around the sensitive ear area ensuring a comfortable fit.

Available with a headband:
A headband instead of the side pieces ensures a snug fit, even under difficult working conditions.

uvex x-trend · 9177

Stylish yet protective – the latest trend in safety eyewear

With an anatomically shaped wrap-around lens, the uvex x-trend is an expression of fashion today – after all, eyewear with large lenses conquered the world long ago. In addition to its stylish design, the uvex x-trend offers a high degree of safety with its large lens.

It offers a clear view in all directions, 20 % more cover than normal temple glasses, UV protection up to 400 nm and if desired, the comfortable uvex side arms with x-stream-technology (XST).

The uvex x-trend – stylish yet protective. Now there's no longer any need to hide behind your spectacles at work.

Optional:
uvex XST for extreme comfort that you can feel! Thanks to a smooth transition from hard to soft plastic.

- Smooth transition between materials
- High flexibility
- Non-slip surface
- Patent pending

uvex cybric, style at work

Don't wait for the future – it has already arrived.

Ahead of its time: uvex cybric. Dynamic and sporty in a modern design. For people with spirit of the times. With innovative lenses and side pieces. The four pads of the quattroflex temple in the sensitive ear region ensure a comfortable fit that doesn't pinch. Spectacles with a large protective area, a long field of vision, and winning looks. For dynamic employees who work hard and expect more from their safety spectacles than mere safety.

Accessories

uvex spectacles case

This new case was specially developed primarily with goggles with strong curvature in mind (e.g. i-vo). In addition to its convenient characteristics of a belt buckle and a practical snap hook, this hard case also stands out due to its innovative and fashionable design. The goggles are embedded in the soft interior, and are also excellently protected from external mechanical influences by the extremely robust construction of the case.

art.-no.	9954.600
colour	black

uvex spectacles case

Extremely robust case with reinforced zipper and belt loop. Additional space for spare lens. Suitable for all uvex spectacles (except 9167).

art.-no.	9954.500
colour	black

uvex spectacles case

Classic case with snap fastener, suitable for models 9103, 9115, 9129, 9130, 9150, 9151, 9152, 9156, 9159, 9161, 9162, 9163, 9165, 9166, 9168, 9172, 9177, 9180, 9182, 9185.

art.-no.	9954.000

uvex spectacles case · gravity zero

This case was specially developed for uvex gravity zero models. With its extra flat design and belt loops, it can be worn very close to the body and is therefore convenient for keeping your spectacles to hand.

A partition inside creates space for a spare lens.

art.-no.	9954.525
colour	dark blue

uvex hard shell case

Hard shell case for models 9137, 9150, 9151, 9152, 9154 and 9155.

art.-no.	9955.000
colour	grey

uvex SECU Box

Hardshell case for wall mounting, suitable for temple spectacles and safety goggles.

art.-no.	9957.502
colour	blue

Safety eyewear

UV protection · Prescription safety spectacles

gravity zero

UV protection up to 400 nanometres

uvex products with clear lenses

Clear plastic lenses offer 100 % protection from UVA, UVB and UVC rays in line with EN 166. If no protection is worn over a long period of time, the short-wave blue light in the visible colour spectrum up to 400 nm can damage the eyes. All clear polycarbonate lenses filter UV rays up to 400 nm.

uvex products with tinted lenses

As well as offering complete UV protection, our tinted lenses protect wearers from glare. The ability to recognise striking colours remains unaffected in line with EN 172.

uvex welding protection

All lenses which are offered for welding protection filter UV and IR rays as well as providing glare protection. The lenses comply with EN 169.

uvex prescription safety spectacles

Prescription safety spectacles combine customised vision correction lenses with EN-tested safety eyewear as required by professional associations in workplaces which can potentially damage the eyes.

Hardened glass, modified CR 39 and polycarbonate can be used for the lenses of prescription spectacles, all of which have EN approval. A range of spectacle types – which also satisfy varifocals and close work requirements – provides the same or a heightened level of comfort for the eyes.

uvex offers a range of fashionable frames for prescription spectacles and superior vision for on-screen work.

Our prescription safety spectacle team will be happy to help you on tel. +49 (0)911 9736 1998.

Laser protection goggles
